

Awwal Design HubSpot Template Documentation

FOR BLOG LISTING

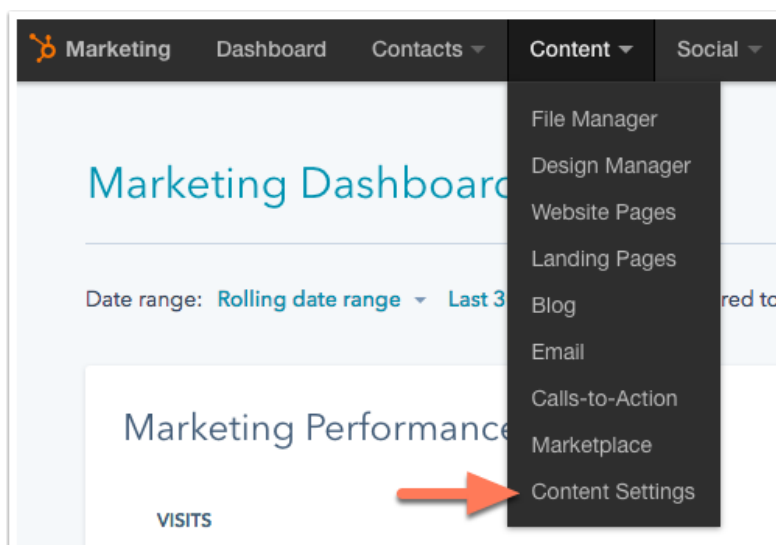

Getting Started

Once you purchase the template, it will be added to your HubSpot account. You can find your template in Design Manager.

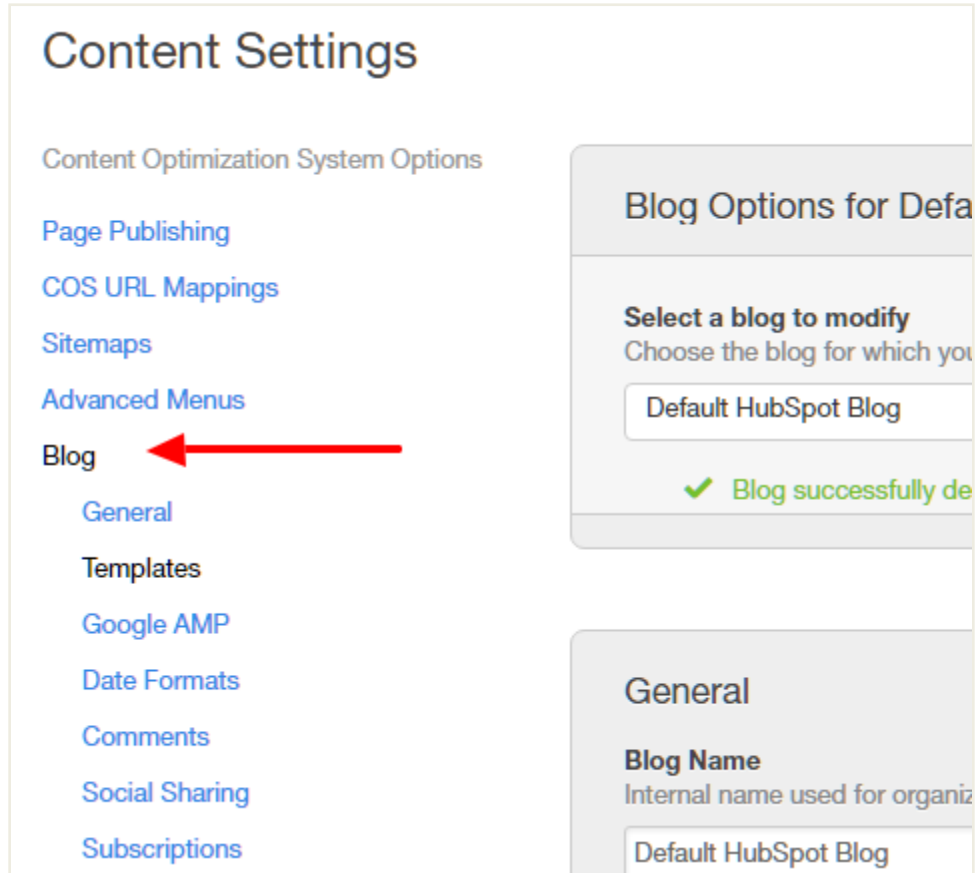

To start using your new template you need to replace the default blog template with the new one. To change your blog template, follow the steps below:

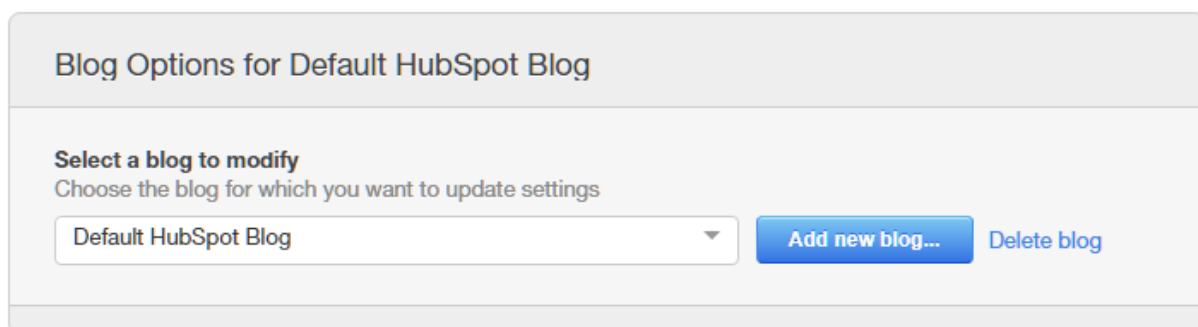

- Navigate to your Content Settings by going to Content > Content Settings.

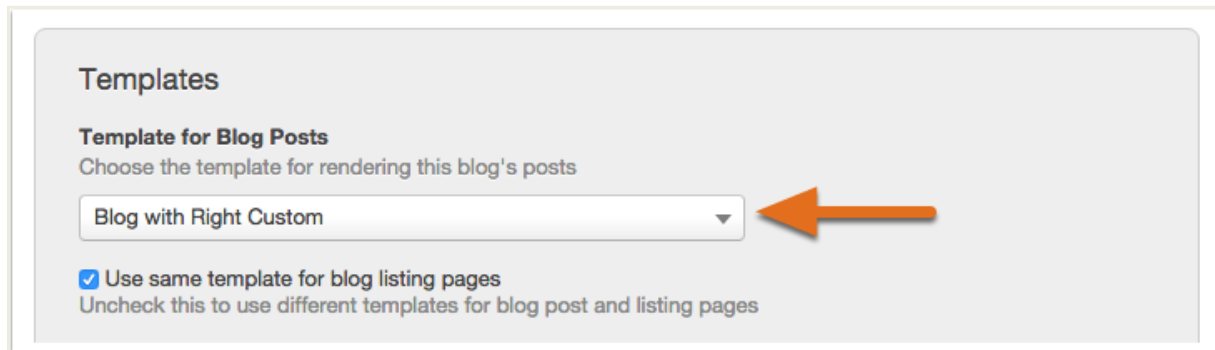

b) Click Blog from the left-hand side menu.

c) At the top of the page, under 'Select a blog to modify,' select the blog that you'd like to change the template for within the dropdown menu.

- d) Scroll down to the 'Templates' section of the settings page, and select the new template from the dropdown under 'Template for Blog Posts.'

Templates

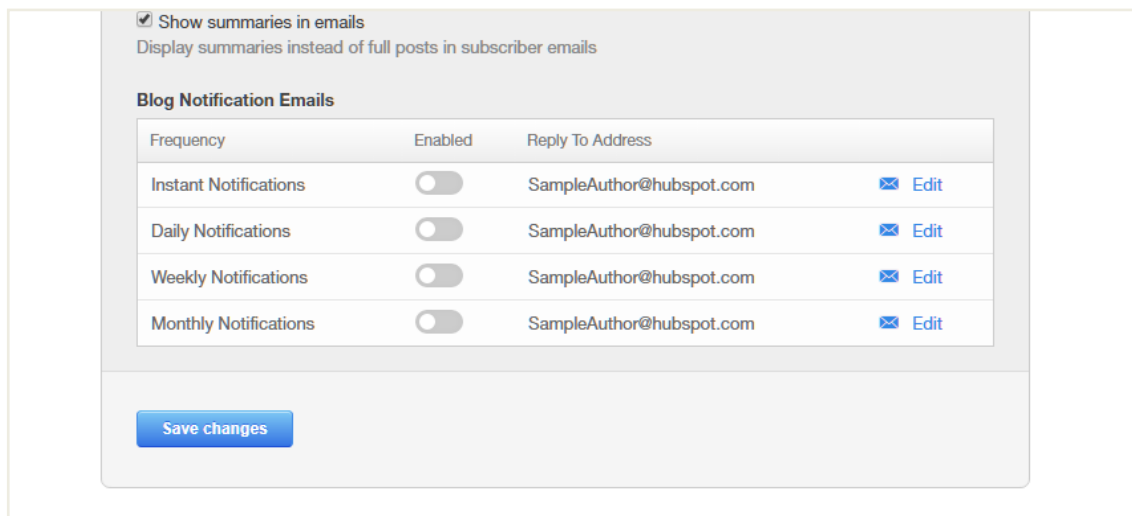

Template for Blog Posts
Choose the template for rendering this blog's posts

Blog with Right Custom ▼

☒ Use same template for blog listing pages
Uncheck this to use different templates for blog post and listing pages

Uncheck the "Use same template for blog listing pages"

- e) Click **Save Changes** to apply the template to your blog.

☒ Show summaries in emails
Display summaries instead of full posts in subscriber emails

Blog Notification Emails
